† Ventless certification is for all food items except for foods classified as "fatty raw proteins." Such foods include bone-in, skin-on chicken, raw hamburger meat, raw bacon, raw sausage, steaks, etc. If cooking these types of foods, consult local HVAC codes and authorities to ensure compliance with ventilation requirements.

Ultimate ventless allowance is dependent upon AHJ approval, as some jurisdictions may not recognize the UL certification or application. If you have questions regarding ventless certifications or local codes please email ventless.help@turbochef.com

SHORT FORM SPECIFICATIONS

Provide TurboChef Fire countertop oven. The Fire cooks artisan and traditional style pizzas up to 14 inches. The Fire oven allows an operator to independently control the top and bottom temperature in the cavity which ensures precise delivery of top and bottom heat. Additionally, it features 6 preset timers. The Fire oven uses TurboChef catalytic technology in order to eliminate smoke and grease during operation, allowing the oven to be UL®-certified for ventless operation. The exterior and interior are constructed with 430 stainless steel. The outer wrap and door are available in six powder-coated colors (red, green, black, white, or blue).
